

End2End Performance & Availability Monitoring of Web & Other Network Applications

Overview

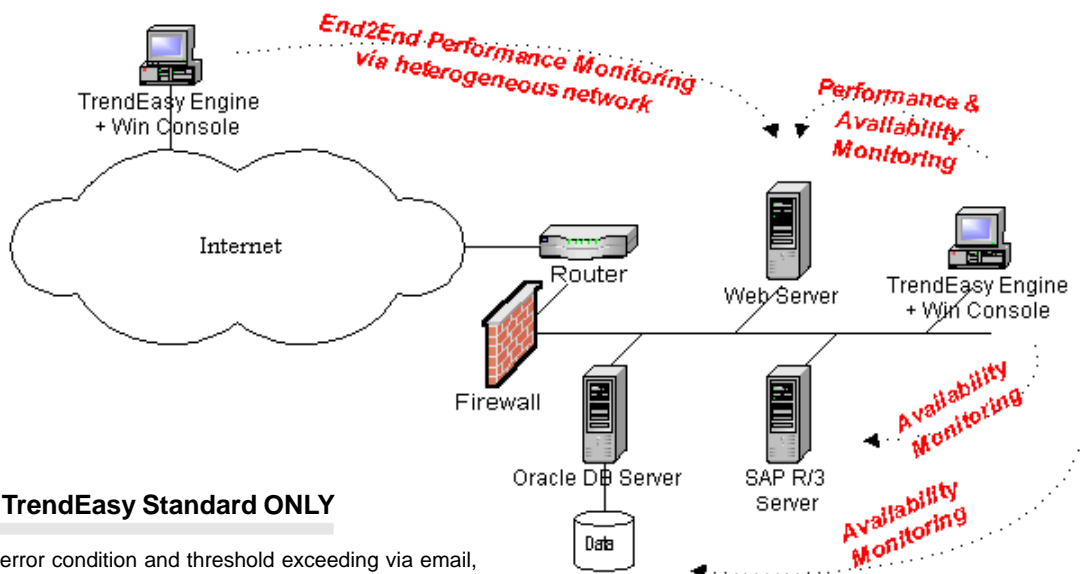

TrendEasy Lite is a FREEware edition of the commercial product TrendEasy Standard. TrendEasy Lite is a windows-based application that monitors the end-to-end performance and availability of Web & other network applications. It is optimized for unattended operation under Windows 2000/NT/Me/98/95/XP platforms. TrendEasy Lite continuously monitors the end-to-end response times, throughput and completion times of Web URLs (both static and dynamic pages) and all TCP ports. Status and performance data of web and network applications are presented in easy-to-read reports on the admin console. When error conditions are detected or the thresholds are exceeded, TrendEasy Lite automatically dispatches alert messages on the console.

Absolutely FREE, No Expiration & Obligation!

This is a FREEWARE that any interested individual, company and organization can freely use and distribute it. The FREEware TrendEasy Lite and the FREE 30-days trial of TrendEasy Standard are available in www.trendeasy.com for download.

Features

- Continuously monitors the end-to-end performance and availability of Web URLs & TCP services (ports).
- Capture end-to-end response time, throughput and completion time from the monitoring endpoint to the network applications. (no matter via LAN, WAN, Internet or Intranet, local or global.)
- Monitors both static and dynamic Web pages, and SSL (i.e., HTTPS)
- Monitors most network applications including FTP, DNS, SMTP, POP3, Oracle SQL*Net, MS SQL Server, Lotus Notes, SAP R/3, Peoplesoft, Baan, Active Directory, Exchange, NT File/Print, LDAP, Telnet ...
- Pre-define all well-known network applications and easy to define any others by specifying the TCP port.
- Monitors applications running on any OS platform, e.g. MS Windows, Linux, Sun Solaris, OS/400, MVS, ...
- No server-based service or agent needed to be loaded.
- Multiple monitoring services for each Web URL or TCP application.
- Tracks & reports the response time, throughput, completion time & error condition on the windows admin console.

Features in TrendEasy Standard ONLY

- Alerts the error condition and threshold exceeding via email, HTTP request and command-line program execution. Alerts by pager & SMS message can also be supported via specific gateway integrated.
- Remotely administration via the Web & WAP admin console
- Alarm Log & System Log files
- Supports unlimited number of monitoring services (subject to the license purchased)

Platforms and System Requirements

- Pentium class PC, Additional 4MB RAM, 7MB free disk space
- Support Microsoft Windows 2000/NT4.0/Me/98/95/XP
- TCP/IP network connection
